***Terminal Disclaimer***

1. The terminal disclaimer filed on 8/29/07 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Application number 10/388,925 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Response to Arguments***

2. Applicant's arguments, see pages 8-13, filed 7/23/07, with respect to the claims have been fully considered and are persuasive. The rejection of the pending claims has been withdrawn.

***Allowable Subject Matter***

3. Claims 1,3-14, and 16 are allowed.

4. The following is an examiner's statement of reasons for allowance: As persuasively argued by the applicant none of the prior art of record discloses in combination with the other limitations of the claim a method of controlling an object's motion through a viewed space comprising edge-processing said stereo image to generate a plurality of connected edgelets; identifying connected edgelets having length greater than a predetermined threshold as features; matching features to generate disparities generated from different images in said image set; and computing 3D locations of feature points according to at least said disparities. Thus claim 1 and its dependent claims 3-14 are allowable over the prior art. Similarly in regards to claim 16 none of the prior art of record discloses in combination with the other limitations of the

claim a method of determining an object's trajectory comprising edge processing said stereo image to generate a plurality of connected edgelets, identifying connected edgelets having length greater than a predetermined threshold as features clustering said features to generate objects and tracking the objects in multiple frames.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
